The Iliff School of Theology is committed to protecting the health and well-being of our community (all students, faculty, and staff), their families, our visitors, and any others in the surrounding community who spend time on our campus against the coronavirus (COVID-19). In light of both the Iliff Employee Vaccination Policy (effective May 10, 2021) and the Iliff Student COVID-19 Vaccination Policy (effective June 12, 2021), this policy serves as guidance for when an individual is feeling ill with COVID-19 symptoms.

**COVID-19 Symptoms**
People with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness. Symptoms may appear 2–14 days after exposure to the virus. Anyone can have mild to severe symptoms. People with these symptoms may have COVID-19:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

If you experience any COVID-19 symptoms, you should get tested promptly and stay home except to receive medical care. If you experience COVID-19 symptoms while on campus, you must leave campus immediately. COVID-19 testing is generally free, with results within 72 hours. A list of testing sites around Denver can be found at: [https://covid19.colorado.gov/testing](https://covid19.colorado.gov/testing)

**Students** who are experiencing symptoms of COVID-19, have tested positive for COVID-19, or have been quarantined need to immediately contact their Advisor ([advising@iliff.edu](mailto:advising@iliff.edu)) and also include the date(s)/time(s) you were recently on campus, to assist with contact tracing. The Advisors will work with students and their faculty to ensure the student’s coursework is minimally interrupted. Students will need to work with faculty to make-up any missed assignments.

**Employees** who are experiencing symptoms of COVID-19, have tested positive for COVID-19, or have been quarantined need to immediately contact both their supervisor and Human Resources ([humanresources@iliff.edu](mailto:humanresources@iliff.edu)) and also include the date(s)/time(s) you were recently on campus, to assist with contact tracing.

You will not be permitted to return to Iliff’s campus until:
- You have documentation that you are negative for COVID-19 or
- You have documentation from a healthcare professional confirming you can return to class/work after symptoms have subsided or
- You have isolated* for 10 days or quarantined** for 14 days.

---

*The CDC states: **Isolation** is for sick people and people who test positive for COVID-19. It means staying away from others until:
- No fever for 24 hours (without medicine that reduces fevers).
- At least 10 days have passed since symptoms started or you tested positive.
- Symptoms are getting better.

**The CDC states: **Quarantine** is for people who have been exposed to someone who has symptoms or has tested positive for COVID-19. It means staying away from others for 14 days. If you have the virus, quarantine keeps you from spreading it to others. During quarantine, if you get sick or test positive for COVID-19, you should isolate.
